Tools: Microsoft Visual Studio, Android Studio, AWS Codecommit, AWS S3 Bucket, Git, Github, Postman, DBeaver, Microsoft Teams, Zoom, Trello

Professional Experience

KW International

Aug 2020 – Present

Business Solutions Service

In-house Website for Company-Wide Logistics Use

- Created features such as automating document creation to **streamline employee efficiency**
- Formulated SQL code to obtain precise filtered data and **decrease overall load** in front end
- Performed regular end to end tests of newly developed procedures and fixed emerging bugs
- Handled user feedback and updated functionality to user's specification and satisfaction

ServiceQuick Mobile Application

Handles Inbound and Outbound Packages between Warehouses

- Researched **Flutter** and **Dart** as a new technology to overhaul a legacy application
 - Collaborated with different users and managers to gain perspective of warehouse processes
 - Planned and deployed a production ready application in **under 4 months**
 - Customized an intuitive UI and removed redundant steps to **increase navigation efficiency by 20%**
 - Organized the code structure under a MVC design pattern for reduced complexity
-

Projects

DogeWisdom - dogewisdom.netlify.app

Jan 2022 – Mar 2022

Reddit Crypto Popularity Tracker

- Networked API calls to gather reddit cryptocurrency tracking data from apewisdom.io
 - Categorized data between different subreddits and displayed filtered data
 - Conveyed ideas about how to display the data points and iterated through different designs
 - Harnessed MongoDB to simplify user data into its own object and remove clutter compared to SQL
-

Education

University of California, Irvine

Mar 2020

Bachelor of Science: Computer Game Science
