Professional Experience

KW International - kwinternational.com   **Aug 2020 – Present**

Business Solutions Service Website
In-house Website for Company and Client Business and Logistics Use
- Accelerated the deployment of a new program with a **performance improvement of 200%**
- Created procedures such as automating document creation to **streamline employee efficiency**
- Formulated **SQL** code to obtain precise filtered data and **decrease overall load** in computation
- Performed regular end to end tests of newly developed systems and fixed emerging bugs
- Handled user feedback and updated functionality to user's specification and satisfaction

KW Warehouse Android App
Handles Inbound and Outbound Orders in KW Warehouses
- Utilized **Kotlin** and **Android Studio** to develop demanding features that assist in company growth
- Devised documentation of codebase and procedures alongside coworkers for easy reference
- Analyzed and implemented 3rd-party packages to **slash redundant code** and hasten development
- Integrated custom solutions for better user interface useability and flow

ServiceQuick Mobile App
ServiceQuick Package Data and Route Management
- Researched **Flutter** and **Dart** as a new technology to overhaul the legacy ServiceQuick Android App
- Launched a production ready application in under 4 months **cutting deadline estimates by 25%**
- Collaborated with different users and managers to gain perspective of required processes
- Organized code structure under a **MVC design pattern** for reduced complexity and rapid prototyping

---

Education

University of California, Irvine   **Mar 2020**
Bachelor of Science: Computer Game Science
